Switches

Declarations

Johnson Electric Germany GmbH & Co. KG

Industry Products Group - Switches

Statement

Hereby we certify that our switches do not contain banned substances and comply with the requirements of the European Directive 2002/95/EC respectively 2011/65/EC (RoHS)

on the restriction of use of certain hazardous substances in electrical and electronic equipment and its amendments (2005/18/EC and others).

To the best of our knowledge, our material suppliers do not use in the manufacture of their products the hazardous substances which are listed in the above mentioned EU Directive.

However, we do not routinely analyse the materials for the hazardous substances nor do we require our material suppliers to do so.

This statement covers also switches with pre-mounted wires, connectors, plugs etc. and components of switches which will be delivered separately such as actuators and caps.

We hope for your understanding that we for our multitude of products and customers can not answer customer specified questionnaires.

Place and date: Haiger, 2013-07-04

Johnson Electric Germany GmbH & Co. KG

Approval Manager

This statement is based on our current level of knowledge and covers the products as supplied by Johnson Electric at the date of issue. Since conditions of use are outside Johnson Electric control, Johnson Electric makes no warranties, express or implied, assumes no liability in connection with any use of this information.

Customer information about REACH, (EC) Regulation No 1907/2006

Hereewith we would like to inform you, that we produce articles – electrical components, switches, micro-switches etc. - (not chemicals) which are not intended to release any substances under normal conditions of use.

In accordance with the REACH Regulation we act as a Downstream-User and along the supply chain we are on communication with our suppliers to fulfill the requirements. The documentation will be updated, if necessary.

To the best of our knowledge, our articles do not contain any substances above 0,1 mass-% per product, that is compliant to ECHA¹ on updated Candidate List below Annex XVII of Substances of Very High Concern; for authorisation dated 2014-12-17 with currently 161 results.

Please note that these substances have not been banned for use. The SVHC list only indicates that these substances may become subject to authorization. For this some of our suppliers confirm that they themselves or their up-stream supplier have pre-registered all substances which are contained in their current products and require a registration. However registration numbers will not be available before the registration of the substances by our suppliers.

For these reasons we are sure that we can continue in future with our products in the market under REACH.

We appreciate your understanding, that we cannot answer customer specified questionnaires due to our multitude of products and customers.
